BULLISH ON BARCODING

Barcoding and RFID have become key technologies to the manufacturing and distribution industries. Here's why you should choose ScanTexas as your partner to implement projects with solutions from the industry leader Zebra.

DEPENDABULL. We have 125+ years of experience to leverage for your project implementation.

MOBULL. We come to you to solve your business challenges as needed.

RELIABULL. Our superior technical support gets it done on time and on budget.

FLEXIBULL. We offer a complete range of solutions—from hardware to packaged or custom software.

SCALABULL. From one scanner to one million square feet, we do it all!

➤ ALL TOUCH TELNET
Reduce data entry errors by up to 60%, speed up data entry by up to 39%, and reduce operator training—no host changes, no risk. Achieve all this with a software tool that displays the telnet screen in a graphical interpretation.

➤ INVENTORY CONTROL SOFTWARE SOLUTIONS
Improve accuracy and efficiency of receiving, putaway, inventory counts, picking, and shipping operations with software solutions that enable the use of barcode scanning mobile computers with your existing systems, such as SAP and others.

➤ WORK-IN-PROCESS
Enabling cradle-to-grave tracking, barcode scanning ensures that the right parts are being used while also capturing lot number data for quality assurance purposes. With our WIP solutions, you will always know production status in real time.

➤ WAREHOUSE WIRELESS
Provide high speed, highly secure wireless everywhere it is needed. Network and mobile device management solutions allow you to support popular wireless devices including smartphones and tablets with minimal administrative effort.

➤ VOICE OVER IP COMMUNICATIONS
Get rid of your walkie talkies and use new mobile computers for all facility voice communications.

➤ DEVICE MANAGEMENT SOLUTIONS
Rapidly setup and deploy mobile devices with a setup barcode scan. Eliminate mobile downtime by ensuring only the right software applications and OS versions are being used on your mobile devices. Secure and manage all endpoints to improve system security.

➤ RFID
Take your data collection to a higher level; move beyond barcoding to RFID. ScanTexas has a comprehensive portfolio of RFID solutions, from RFID media and printers to RFID mobile computers and complete software solutions to make RFID work for you.

➤ LOCATIONING
Locationing technologies—including RFID and RTLS—give you greater insight over your assets, people, and actions. You know in real time the location, condition, timing, accuracy, and speed of the events occurring throughout your operations. Know where your critical assets and people are at all times.

➤ BUSINESS PROCESS IMPROVEMENT CONSULTING
ScanTexas consulting resources can assist clients in achieving functional improvements in productivity, service, and quality through business process improvement.

Contact us to plan, develop, and implement your enterprise intelligence strategy.
